Scott Frasier

1. embryology imaging

## Methods

1. Hybridization chain reaction (HCR) Dirks et. al 2004
  - quantitiave
  - better resolution than conventional FISH
2. CytoF
  - not work for RNA ISH
3. MUSE HCR
  - method of amplificaiton; works off simliar principle to cyTOF?

## approaches to speed imaging

1. DSLM (laser-scanning to create excited plane)
